Any Platform Terms and Policies we promulgate will be available at Solve.Care website. We may add terms or policies to the Platform Terms and Policies in our sole discretion, and may update each of the Platform Terms and Policies from time to time according to modification procedures set forth therein. To the extent of any conflict with these Terms, the Platform Terms and Policies shall control with respect to any issues relating to the use of Tokens in connection with the Platform.

EXHIBIT C

RISK FACTORS ASSOCIATED WITH TOKENS

Important Note: As noted elsewhere in the Token Sale Agreement, the Tokens are not being structured or sold as securities or any other form of investment product. Accordingly, none of the information presented in this **Exhibit C** is intended to form the basis for any investment decision, and no specific recommendations are intended. Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in this **Exhibit C**, (ii) any error, omission or inaccuracy in any such information or (iii) any action resulting from such information.

By purchasing, holding and using Tokens, you expressly acknowledge and assume the following risks:

1. ***Risk of Losing Access to Tokens Due to Loss of Private Key(s), Custodial Error or Purchaser Error***

A private key, or a combination of private keys, is necessary to control and dispose of Tokens stored in your CAN account. Accordingly, loss of requisite private key(s) associated with your CAN account storing Tokens will result in loss of such Tokens. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a CAN account, may be able to misappropriate your Tokens. Any errors or malfunctions caused by or otherwise related to CAN account you choose to receive and store Tokens, including your own failure to properly maintain or use such CAN account, may also result in the loss of your Tokens. Additionally, your failure to follow precisely the procedures for buying and

receiving Tokens, including, for instance, if you provide the wrong address for receiving Tokens, may result in the loss of your Tokens.

2. *Risks Associated with the Ethereum Protocol*

Because Tokens and the Platform are based on the Ethereum protocol, any malfunction, breakdown or abandonment of the Ethereum protocol may have a material adverse effect on the Platform or Tokens. Moreover, advances in cryptography, or technical advances such as the development of quantum computing, could present risks to Tokens and the Platform, including the utility of Tokens for obtaining Services, by rendering ineffective the cryptographic consensus mechanism that underpins the Ethereum protocol.

3. *Risk of Mining Attacks*

As with other decentralized cryptographic tokens based on the Ethereum protocol, Tokens are susceptible to attacks by miners in the course of validating Tokens transactions on the Ethereum Blockchain, including, but not limited, to double-spend attacks, majority mining power attacks, and selfish-mining attacks. Any successful attacks present a risk to the Platform and Tokens, including, but not limited to, accurate execution and recording of transactions involving Tokens.

4. *Risk of Hacking and Security Weaknesses*

Hackers or other malicious groups or organizations may attempt to interfere with the Platform or Tokens in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing and spoofing. Furthermore, because the Platform is based on open-source software, there is a risk that a third party or a member of the Company team may intentionally or unintentionally introduce weaknesses into the core infrastructure of the Platform,

which could negatively affect the Platform and Tokens, including Tokens' utility for using the Platform.

5. *Risks Associated with Markets for Tokens*

Tokens are intended to be used solely on the Platform, and Company will not support or otherwise facilitate any secondary trading or external valuation of Tokens. This restricts the contemplated avenues for using Tokens to access or use the Platform, and could therefore create illiquidity risk with respect to Tokens you hold. Even if secondary trading of Tokens is facilitated by third party exchanges, such exchanges may be relatively new and subject to little or no regulatory oversight, making them more susceptible to market-related risks. Furthermore, to the extent that third-parties do ascribe an external exchange value to Tokens (e.g., as denominated in a digital or fiat currency), such value may be extremely volatile and diminish to zero.

6. *Risk of Uninsured Losses*

Unlike bank accounts or accounts at some other financial institutions, Tokens are uninsured unless you specifically obtain private insurance to insure them. Thus, in the event of loss or loss of utility value, there is no public insurer or private insurance arranged by us, to offer recourse to you.

7. *Risks Associated with Uncertain Regulations and Enforcement Actions*

The regulatory status of Tokens and distributed ledger technology is unclear or unsettled in many jurisdictions. It is difficult to predict how or whether regulatory agencies may apply existing regulation with respect to such technology and its applications. It is likewise difficult to predict how or whether legislatures or regulatory agencies may implement changes to law and regulation affecting distributed ledger technology and its applications, including the Platform and Tokens. Regulatory actions could negatively impact the Platform and Tokens in various ways.

Company may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction.

8. *Risks Arising from Taxation*

The tax characterization of Tokens is uncertain. You must seek your own tax advice in connection with purchasing Tokens, which may result in adverse tax consequences to you, including withholding taxes, income taxes and tax reporting requirements.

9. *Risk of Alternative Platforms*

It is possible that alternative platforms could be established that utilize the same open source code and protocol underlying the Platform. The Platform may compete with these alternative platforms, which could negatively impact the Platform and Tokens, including Tokens' utility for obtaining Services.

10. *Risk of Weaknesses or Exploitable Breakthroughs in the Field of Cryptography*

Advances in cryptography, or technical advances such as the development of quantum computers, could present risks to crypto currencies and the Ethereum platform and Tokens, which could result in the theft or loss of tokens.

11. *Risk of Insufficient Interest in the Platform or Distributed Applications*

It is possible that the Platform will not be used by a large number of individuals, companies and other entities or that there will be limited public interest in the creation and development of distributed platforms (such as the Platform) more generally. Such a lack of use or interest could negatively impact the development of the Platform and the potential utility of Tokens.

12. *Risks Associated with the Development and Maintenance of the Platform*

The Platform is still under development and may undergo significant changes over time. Although we intend for Tokens and the Platform to follow the specifications set forth in **Whitepaper**, and will take commercially reasonable steps toward those ends, we may have to make changes to the specifications of Tokens or the Platform for any number of legitimate reasons. This could create the risk that Tokens or the Platform, as further developed and maintained, may not meet your expectations at the time of purchasing Tokens. Furthermore, despite our good faith efforts to develop and maintain the Platform, it is still possible that the Platform will experience malfunctions or otherwise fail to be adequately developed or maintained, which may negatively impact the Platform and the potential utility of Tokens.

13. Risk of an Unfavorable Fluctuation of Ether and Other Currency Value

The Company team intends to use the proceeds from selling Tokens to fund the maintenance and development of the Platform. The proceeds of the sale of Tokens will be denominated in Ether, and may, at our discretion, be converted into other cryptographic and fiat currencies. If the value of Ether or other currencies fluctuates unfavorably during or after the Pre-Sale Period and Open Sale Period, the Company team may not be able to fund development, or may not be able to develop or maintain the Platform in the manner that it intended.

14. Risk of Dissolution of the Company

It is possible that, due to any number of reasons, including, but not limited to, an unfavorable fluctuation in the value of Ether (or other cryptographic and fiat currencies), decrease in Tokens' utility, the failure of commercial relationships, or intellectual property ownership challenges, the Platform may no longer be viable to operate and the Company may dissolve.

15. Risks Arising from Lack of Governance Rights

Because Tokens confer no governance rights of any kind with respect to the Platform or Company, all decisions involving the Platform or Company will be made by Company at its sole discretion, including, but not limited to, decisions to discontinue the Platform, to sell more Tokens for use in the Platform, or to sell or liquidate the Company. These decisions could adversely affect the Platform and the utility of Tokens that you hold.

16. *Unanticipated Risks*

Cryptographic tokens such as Tokens are a new and untested technology. In addition to the risks included in this **Exhibit C**, there are other risks associated with your purchase, holding and use of Tokens, including those that the Company cannot anticipate. Such risks may further materialize as unanticipated variations or combinations of the risks discussed in this **Exhibit C**.

EXHIBIT D
